# DanfossLon

Driver Legacy

The Danfoss Lonworks driver allows to easily integrate the Danfoss EKC device series into Niagara Framework, with its associated LonWorks OptionCard and the LonWorks driver for the JACE. The driver can be used on JACE stations of Tridium. All driver components, the devices, the detected points, the histories, the alarms and the schedulers are perfectly integrated in Niagara Workbench; this allows a better efficiency in the design and maintenance of the systems, with lower cost results.

The driver can communicate with the device using the appropriate Danfoss LON OptionCard.

Key Features

- Communication driver, with LonWorks protocol through the Danfoss TP78-05 module (Network Bridge FTT10-485).
- Function to discover the "Device" (prerequisite Driver LonWorks).
- Function to discover the "Points" directly from the device.

Application
Refrigeration

Niagara Platform
JACE with LON option

Niagara Version
AX and N4
