

Dixell XWEB

Driver Legacy

The Dixell driver allows the integration of the X-Web Dixell system in Niagara Framework. The Dixell driver can be used on all Tridium Niagara framework in which there is a station (Supervisor or JACE). All driver components, the devices, the detected points, the histories, the alarms and the schedulers are perfectly integrated in Niagara Workbench; this allows a better efficiency in the design and maintenance of the systems, with lower cost results.

The driver can communicate directly via IP with the Dixell controllers of X-Web family.

Key Features

- Communication driver, with IP protocol (X-Web 500/3000/5000).
- Function to discover the "Device".
- Function to discover the "Points".

Application

- Refrigeration
- Air Conditioning

Niagara Platform

JACE or Supervisor
