SchneiderOva

Driver Legacy

The SchneiderOVA driver allows to integrate the Dardo Plus controllers into Niagara Framework. The driver can be used on Tridium JACE stations. All driver components, the devices, the detected points, the histories, the alarms and the schedulers are perfectly integrated in Niagara Workbench; this allows a better efficiency in the design and maintenance of the systems, with lower cost results.

The driver can directly communicate via RS485 with Dardo Plus controller or powered under rescuer.

Key Features

- Communication driver with RS485 protocol.
- Function to discover the "Device".
- Function to discover the "Points".
- Managing the synchronization of date and time of the controller.

Application
- Buiding Automation
- Intelligent Lighting

Niagara Platform
JACE

Niagara Version
AX and N4

CONNECTION WITH SELF-POWERED APPLIANCES

CONNECTION WITH APPLIANCES SUPPLIED BY OVA RESCUER
