

**Integrating Systems • Enhancing Efficiency**

### Adding value

We are the first company in Italy - and among the first globally - to simplify and maximize the potential of the well-established Niagara IoT platform by Tridium. We implement **advanced integrated management systems** and **supervision platforms** for centralized, real-time control of multiple systems, plants, and sites.

### Seamless integration

We carefully select and integrate cutting-edge products and technologies to provide a **comprehensive, fully interoperable solution**. Our systems enhance building performance, reduce costs and energy consumption, and achieve optimal efficiency. Additionally, we **facilitate seamless collaboration** by connecting and exchanging data with various platforms, including ERP, CMMS, PLM, and document management systems.

Interoperability  
across systems

Enhanced  
performance

Cost and  
energy savings

Improved safety  
and comfort

Optimized energy  
efficiency

### Streamlining complexity

We **simplify** configuration, commissioning, integration, maintenance, management, and monitoring processes, making them faster and more efficient.

*Make it Quick Make it Easy*

**SINCE 2008.**

At QuickLink Solutions, we research and develop **advanced, innovative solutions** for **energy management** and **efficiency** in buildings and industries, enhancing **performance** and **comfort**.

**QuickLink Solutions' technologies** are applicable across **diverse sectors**, from **building automation** and **smart industries** to **smart cities**.

# TECHNOLOGY

The **Niagara Framework®** by **Tridium** has **revolutionized** the way devices and systems interact with people, enabling **seamless control** and **optimization**.

This powerful framework enables **connection, normalization, integration** and **interoperability** of diverse devices and equipment within a unified environment. It **supports multiple integrated platforms** and **consolidates multi-vendor systems** into a single, scalable, and extensible platform in real-time.

# SOLUTIONS

## GLOBAL SUPERVISION AND ANALYTICS

Multi-site **supervision** and **centralized control** platform. Powered by Niagara Framework®.

Advanced energy monitoring applications.

Data analysis systems for proactive system optimization.

## APPLICATIONS

Mobile applications for **simplified system** and **alarm management**.

## MACHINE LEARNING

The Easy Machine Learning platform provides **energy consumption forecasting** and **predictive anomaly detection**.\*

*\*Developed by QuickLink Solutions. Compatible with BMS systems, including the Niagara platform.*

## UTILITIES AND INTERFACES

Software utilities and interfaces are designed to **streamline configuration**, **enhance connectivity**, and **optimize** data management.

**QContax**

Multifunctional interface.

**easytunnel**

Simplified connection between controllers and supervisors.

**TelegramClient**

Modules for alarm management via social media channels.

## DRIVERS

Custom drivers for **integrating proprietary communication protocols** into various systems and devices.

**Integration of devices and systems** for automated building and plant management

**Centralized remote and mobile control** for energy optimization

**Development of analytics platforms** for intelligent monitoring

**Predictive anomaly detection** for proactive system efficiency

**Advanced maintenance and technical documentation management**

Specialized **consulting** and **technical support**

**Certified training** on the Niagara platform
