VSB3T	VMB3T	3/4"	6,3	5,5	5,5
VSB4T	VMB4T	1"	10	9	
VSB5T	VMB5T	1 1/4"	14	11	
VSB6T	VMB6T	1 1/2"	18	12	
VSB8T	VMB8T	2"	25	17	

APPLICATION AND USE

VSB.T two-way and VMB.T three-way valves can be used for fluid control in industrial and residential air-conditioning, thermoventilation and heating plants and in machinery for product thermal process.

Three-way valves must be used only as mixers, angle way must never be employed for control purposes.

MANUFACTURING CHARACTERISTICS

G25 cast iron valve body.

Brass plug with Contoured-type profile on direct way and V-port profile on angle way.

CrNi steel stem. Female threaded connections.

Double EPDM O-ring stem packing.

TECHNICAL CHARACTERISTICS

Construction:	PN16
Control characteristic:	linear
Rangeability (Kvs/Kvm):	> 50
Leakage*:	
- VSB.T:	< 0,03% of Kvs
- VMB.T:	direct way < 0,03% of Kvs angle way < 2% of Kvs
Connections:	female thread
Stroke:	5,5 mm
Allowed fluids:	
- Water:	max temperature 95 °C min. temperature 5 °C
- glycol-added:	max 50%
Weight:	see dimensions

*Leakage is measured according to the EN1349 standard.

OPERATION

By pushing the stem inwards, the actuator opens A-AB way and, in three-way valves, it contemporary closes the angle way B-AB

INSTALLATION

Before mounting, ensure pipes are clean, free from weld slag, perfectly aligned with the valve body and not subjected to vibrations. As far as valve mounting positions are concerned, follow the instructions given in the actuator data sheets.

While mounting, respect the fluid directions indicated by the letters on the valve body (see fig. 1 and 2).

FIG. 1

FIG. 2

ACTUATORS

VSB.T and VMB.T valves can be motorized by CONTROLLI MVC.03 and MVC503R actuators.

MAX DIFFERENTIAL CLOSE-OFF PRESSURE [kPa]

DN	DIRECT WAY	ANGLE WAY
3/4"	900	700
1"	550	450
1 1/4"	350	300
1 1/2"	250	200
2"	190	160

100 kPa = 1 bar = 10 m_{H₂O}

MAX REGULATION DIFFERENTIAL PRESSURE [kPa]

The max regulation differential pressure, it means the pressure which can be used during the stroke, is conditioned by wear between seat and plug and by the performance guaranteed by the actuator for the evaluated valve. So we recommend not to overcome the differential pressure whose value corresponds to the minimum between 200kPa (maximum admitted value not to cause wear) and the one shown in the previous table (max close-off differential pressure).

Note: The max operating pressures at different temperatures for various PN classes must correspond to the following standards: UNI 1092-2 and UNI 12516-1.

ACCESSORIES

CAST IRON FITTINGS 3 PIECES			
THREAD		FITTING CODE	SEAL CODE

APPLICATION SCHEMES

VSB.T VALVES

a) Variable flow control when used

b) Constant flow control for use in injection circuits

VMB.T VALVES

c) Variable flow mixing when used

d) Constant flow mixing when used in injection or tapping circuits
