# CarelDriver

Driver Legacy

The Carel driver allows to integrate all Carel devices with proprietary protocol into Niagara Framework. The driver can be used on Tridium JACE stations. All driver components, the devices, the detected points, the histories, the alarms and the schedulers are perfectly integrated in Niagara Workbench; this allows a better efficiency in the design and maintenance of the systems, with lower cost results.

The driver can communicate with the device equipped with the appropriate RS485 serial interface (IROPZ48500 or IROPZ485S0).

Key Features

- Communication driver, with RS485 protocol.
- Function to discover the "Device".
- Function to discover the "Points".

Application
- Refrigeration
- Air Conditiong

Niagara Platform
JACE

Niagara Version
AX and N4
