

easynotification

Niagara alarm notification application

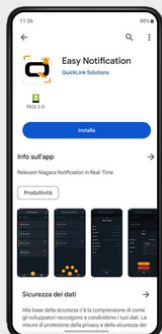

Easy Notification App is the application by QuickLink Solutions that allows to view Niagara alarms notification from any smartphone/tablet and manage them through a simple, intuitive and customizable interface.

Thanks to the **Notification Client**, the use of the **Easy Notification App** for alarm management can be integrated into JACE controllers and N4 Web Supervisors!

Notification Client and Easy Notification App can be used in combination on all platforms that support the Niagara N4 Framework, such as JACE controllers or the N4 Web Supervisor and with all supported smartphones (Android 11 or higher; iOS 14 or higher).

All the components of the Notification Client module are integrated into the Niagara framework, allowing better efficiency in systems engineering and maintenance with a consequent reduction in costs.

The app is available for Android and iOS and you can download it from Google Play Store and App Store.

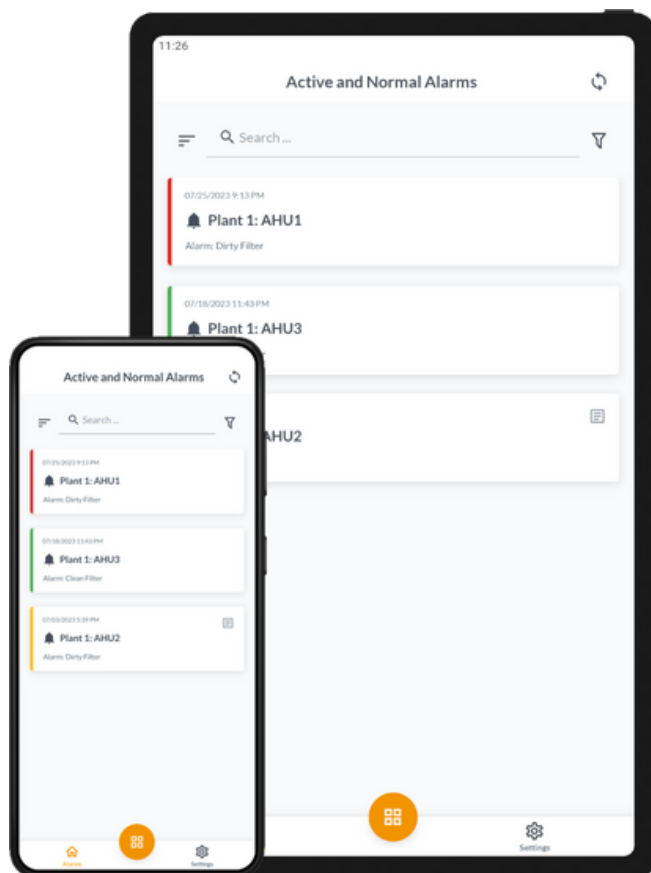

Easy download of the APP via QR CODE.

Easy Notification

*For a correct running of the EasyNotification App, the Notification Client license must be activated. If you have activated an EasyLink license with maintenance, the Notification Client license is already active for up to 3 devices without any additional cost.
