

MAX-IP Series

Multiprotocol I/O Modules

MODEL	DESCRIPTION
iSMA-B-24I-IP	I/O module with 24 digital inputs, BACnet IP and Modbus TCP/IP communication
iSMA-B-12O-H-IP	I/O module with 12 digital outputs, HOA switches, BACnet IP and Modbus TCP/IP communication

APPLICATION AND USE

MAX-IP I/O Modules are a powerful addition to any building automation system, providing ultimate control and monitoring capabilities. The MAX-IP series offers a range of modules, including a 24 digital inputs module and a 12 digital outputs module with hand control, both featuring open protocols such as BACnet and Modbus.

The 24 digital inputs module is designed for monitoring data in data centers and HVAC applications. Its compact design allows for multiple inputs to be packed into one housing, resulting in shorter engineering time, faster integration, and easier commissioning. The 12 digital outputs module is ideal for HVAC applications, allowing for a direct control of up to 3 A loads per single digital output. With HOA switches, manual override of each output is possible, ensuring ultimate control.

All MAX-IP series modules are equipped with commonly used types of I/Os in building automation, and support open communication protocols including Modbus TCP/IP and BACnet IP. The modules are designed to create distributed control systems by extending the capabilities of building controllers like AAC20, iSMA-B-J8, or MAC36NL with inputs and outputs using IP connection.

The modules feature two Fast Ethernet ports that work in a switch mode, allowing for a daisy chain connection of multiple units. Additionally, the modules have an RS485 interface that acts as a Modbus TCP/IP to Modbus RTU/ASCII gateway, enabling the connection of extra devices/modules that communicate as servers (slaves) on the serial bus. Commissioning the system is facilitated by the rotary switches used to address the modules. The modules support open communication standards, allowing them to be installed in both new and completed installations as part of an existing BMS. The built-in mini USB allows for the initial configuration of the unit without a power supply.

FEATURES

- MAXimum benefits of different sets of I/Os
- BACnet IP and Modbus TCP/IP protocols, selected with a DIP switch
- Built-in Modbus TCP/IP to Modbus RTU/ASCII gateway
- 2 Fast Ethernet ports with a built-in switch
- Digital inputs work as fast counters up to 100 Hz
- Digital outputs 230 V AC max. 3 A allow for a direct control without additional relays
- LEDs indicate the status of inputs and outputs
- Simple and fast addressing 0-99 using rotary switches
- BTL certified

TECHNICAL SPECIFICATION

DESCRIPTION		MAX-IP I/O MODULES
Power supply	Voltage	24 V AC/DC \pm 20%
Digital inputs	Number of inputs	24 (24I-IP)
	Type	Dry contact or fast pulse counter
	Maximum input frequency	100 Hz saved in the EEPROM memory

The performances stated in this sheet can be modified without any prior notice.

DESCRIPTION		MAX-IP I/O MODULES	
Digital outputs	Number of outputs	12 (12O-H-IP)	
	Resistive load (AC1)	3 A at 230 V AC, 3 A at 30 V DC	
	Inductive load (AC3)	75 VA at 230 V AC, 30 W at 30 V DC	
COM1	RS485 interface	Up to 128 devices	
	Communication protocol	Half-duplex	
	Ports	Modbus RTU/ASCII, BACnet MS/TP	
	Baud rate	Screw connector	
	Address	2400-115200	
ETH1	Ethernet interface	0-99 set by a rotary switch	
	Communication protocol	1 Fast Ethernet with a switch mode	
	Ports	Modbus TCP/IP, BACnet IP	
	Baud rate	2 RJ45	
USB1	USB 2.0	10/100 Mb/s	
Ingress protection	IP rating	mini USB type B	
Temperature	Storage	IP 20 for indoor installation	
	Operating	-40°C to +85°C (-40°F to +185°F)	
Humidity	Relative	-10°C to +50°C (14°F to 122°F)	
Screw connectors	Type	5 to 95% RH (without condensation)	
	Maximum cable size	Removable screw terminals	
Housing	Material	2.5 mm ² (18...12 AWG)	
	Mounting	Self-extinguishing plastic (PC/ABS)	
Dimensions	Module:	24I-IP	12O-H-IP
	Width	106.30 mm/4.19 in	106.30 mm/4.19 in
	Length	110.00 mm/4.33 in	110.00 mm/4.33 in
	Height	62.00 mm/2.44 in	70.00 mm/2.76 in
