APPLICATION AND USE

The Touch Point VAV is a modern comfort management wall panel with two most popular open communication protocols: Modbus RTU/ASCII and BACnet MS/TP. The Touch Point VAV panel is available in different configurations of sensors (temperature, CO₂, and humidity), colors, and touch buttons. The panel can be configured using the iSMA Configurator software or Modbus registers/BACnet objects. It fits most of standard junction boxes in Europe and can easily be installed using a wall back box.
