EMS MV5/AV5

Energy management system

Description

EMS is an all-in-one smart meter, gateway, web-server and controller. It is an energy analyser that can monitor one three phase load (or 3 single-phase loads), expandable to 10 three-phase loads via ESY bus add-ons.

EMS is a gateway that supports several communication protocols including Modbus (TCP/IP and RTU), BACnet IP, FTP, FTPS, SFTP, Rest-API and MQTT which allow for rapid integration with third-party software and any other device connected to the network (e.g., building energy management systems and inverters or charging stations).

EMS is a stand-alone controller: with two Ethernet ports, RS485 ports and Wi-Fi communication for a easy and simple programming via smart-phone; energy data readings can be pushed to external servers/Cloud and can be stored in the internal memory of the device.

EMS is a web server: for data analytics presented via dashboards, charts and reports.

By combining accurate metering, a powerful Linux powered CPU in a small case, EMS is really a complete Energy Management System in a box.

Compatible with any 333 mV current transformer and with any current transformer with 5 A secondary current. It can be installed in systems with rated current up to 10 kA, even in retrofit applications if used with openable transformers like CTA or CTD S.

Benefits

- **All- in- one Energy Management System**: fully integrated smart meter, data logger, gateway, web server and controller.
- **High measurement accuracy**.
- **User-friendly installation and set up**: the start-up and each function can be managed and configured by a unique web app (compatible with PC and smart-phones).
- **Real-time data acquisition.**
- **Accurate and reliable 3-phase energy measurement for consumption and feed-in.**
- **Scalability**: it is easy to scale up the system thanks to additional ESY accessories.
- **Interoperability**. By leveraging its automation- server functions, it is easy to exchange data with other systems via FTP, SFTP, FTPS, SMTP, Rest- API, MQTT, Modbus and BACnet.
- **Generic MQTT compatibility**: EMS can send real-time data and data can be stored in the EMS database to a generic MQTT broker. Moreover, EMS has been validated for working with Azure IoT and is compatible with Amazon AWS IoT.
- **Powered by MAIA Cloud**: secure and reliable system for remotely managing, setting and operating EMS units Worldwide.
- **Optimised user interface and data management**. Improved user experience for fast commissioning and easy daily operation thanks to a multi-user system.
- **Over- the- Air (OTA) Updates**. Seamlessly update the firmware of multiple deployed devices remotely via the MAIA Cloud portal, ensuring continuous improvement and maintenance without on-site intervention.
- **Quick configuration**. The configuration wizard that runs when the system is started for the first time allows you to put the unit into operation without errors and in few seconds.
- **Cybersecurity (IoT Security Rating)**: Security Capabilities Verified by UL to Level SILVER for EMS (Security Enhancement).
- **Optional Open-EM system**: for allowing third party software modules to be embedded into EMS so to build custom solutions for specific applications.

Main metering functions

- Measure active, reactive and apparent energy
- Measure the main electrical variables
- Measure the load/analyser run hours
- Measure the total harmonic distortion (THD) of current and voltages
- Multi Load monitoring via plug'n play ESY BUS add-on modules

Main IoT features

- Self power supply via voltage inputs
- Data transmission via Modbus BACnet, MQTT, FTP, SFTP, FTPS, Rest-API
- Embedded Wi-Fi for easy programming/data analysis
- Reliable data storage within the embedded database
- Data analytics organized in dashboards and widgets
- Display analytics based on the stored data via the embedded web server
- Embedded reporting system (scheduled or on-demand reports)
- Secure multi-user access either local (embedded web app) or remote (MAIA Cloud)
- Remote access and firmware update via MAIA Cloud (commissioning and troubleshooting)
- Two Ethernet ports (switch mode for easy cascading of connected devices)
- BTL certified
- IoT certification for Amazon AWS and Microsoft Azure
- Embedded display for diagnostics and variables

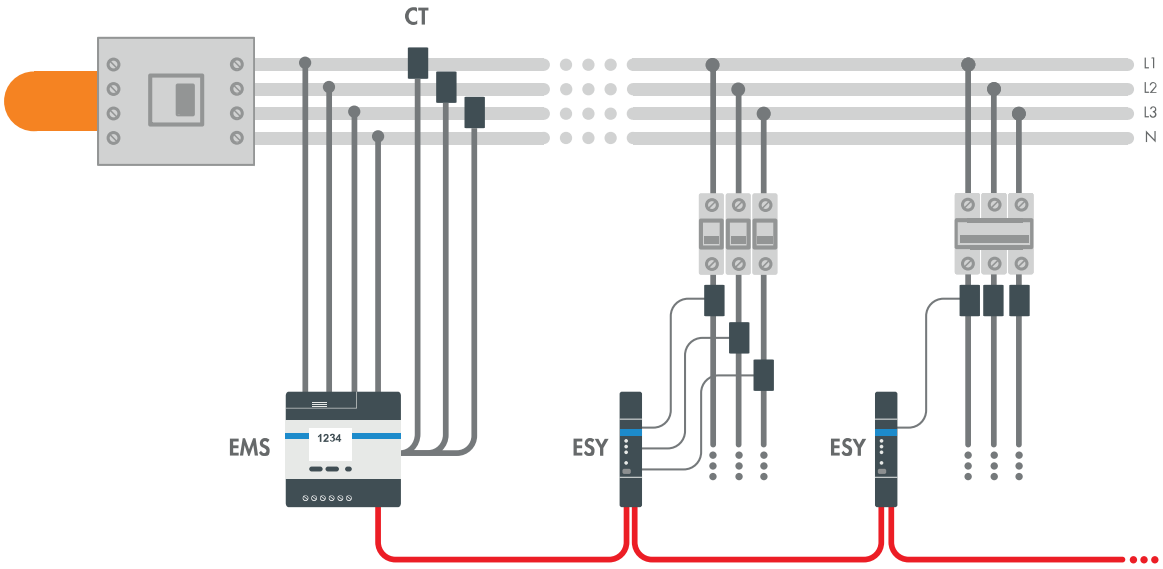
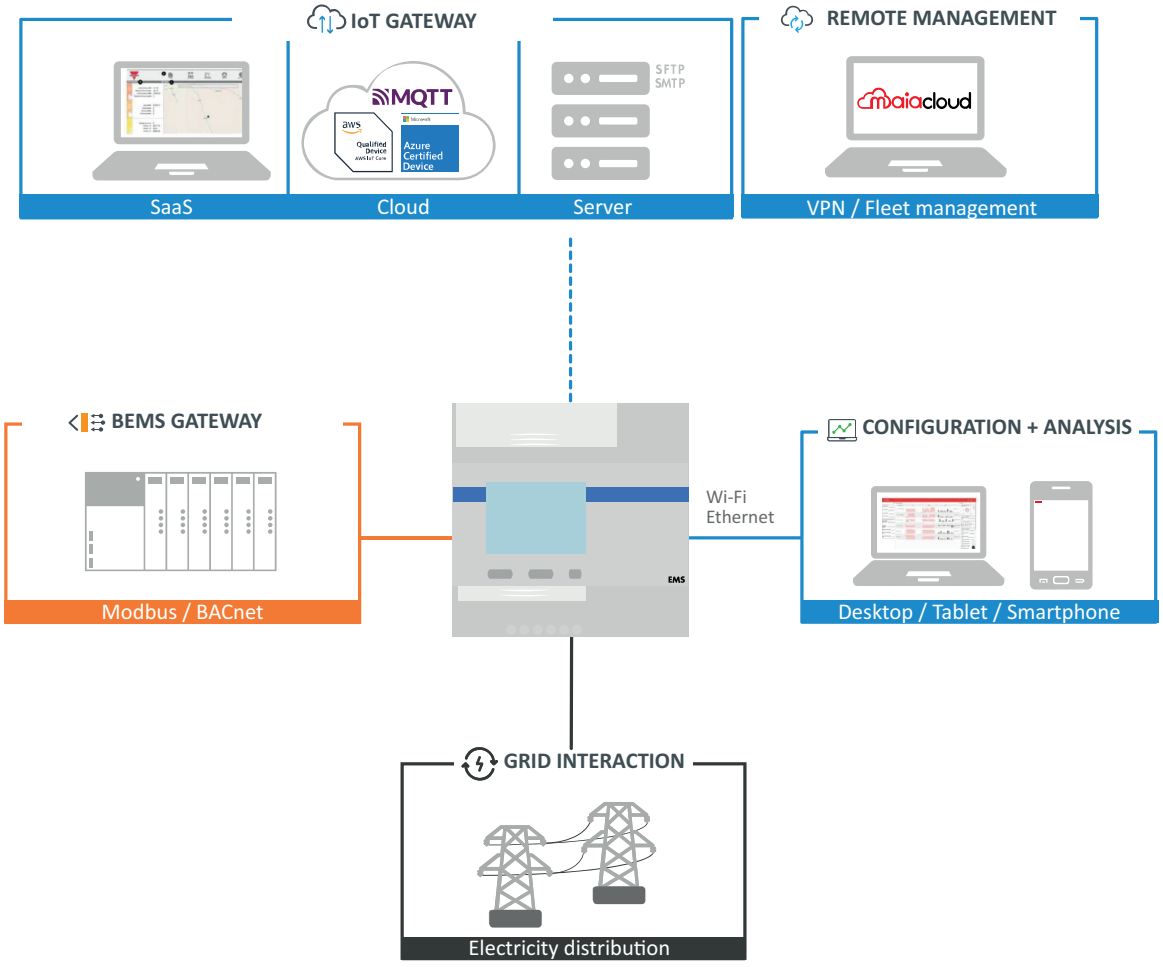
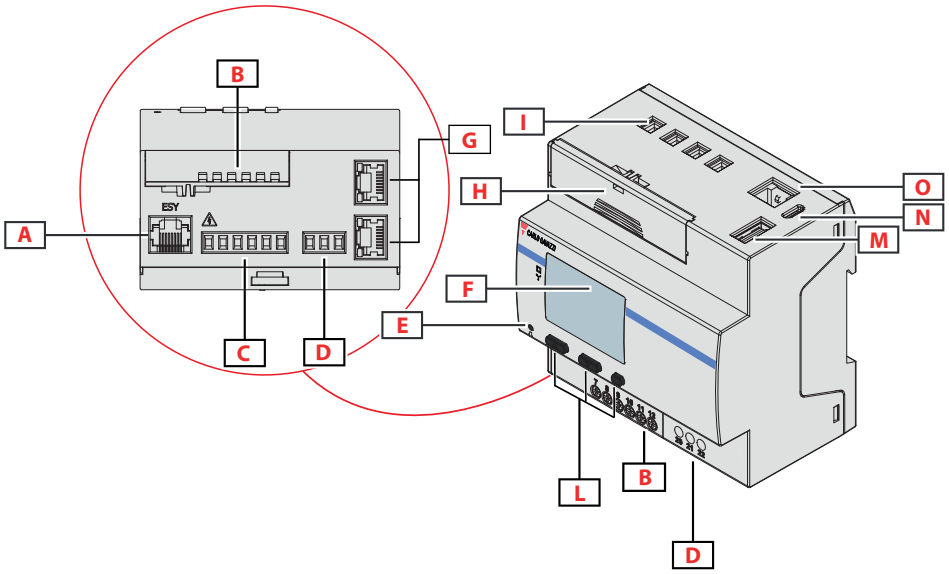
Electrical connection



Connectivity



Structure

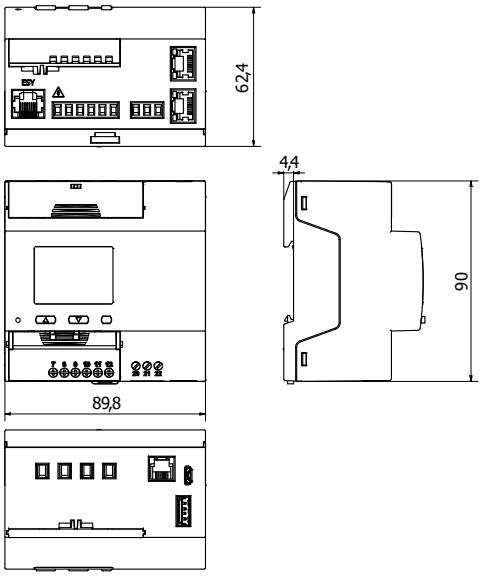


Area	Description
A	ESY Bus port (RJ45)
B	Sliding module (optional digital input and output or RS485 Modbus slave)
C	Current transformer terminals
D	RS485 Modbus master port
E	LED
F	Display
G	Dual Ethernet ports (internal switch)
H	Seal housing
I	Voltage inputs
L	Browsing and configuration buttons
M	USB type A port (4G modem connectivity)
N	Micro USB port (Point to point connection)
O	P1 port (RJ12)

Features

General

Material	Housing: PBT Transparent cover: polycarbonate Compliant with UL and CE marks
Dimensions	5-DIN module
Weight	Approx. 500 g / 1.10 lb
Protection degree	Front: IP40 Screw terminals: IP20
Terminals	**AV5/MV5 voltage input (four terminals):** Screw type: Combo head Wire size: min. 0.2 mm^2, max. 2.5 mm^2 (stranded or solid) Torque: 0.45 Nm max. Sealable, pitch 10 mm **AV5/MV5 current input (six terminals):** Screw type: Combo head Wire size: min. 0.2 mm^2, max. 2.5 mm^2 (stranded or solid) Torque: 0.45 Nm max. Sealable, pitch 5 mm **RS485 Modbus Master port:** Screw type: Combo head Wire size: min. 0.2 mm^2, max. 2.5 mm^2 (stranded or solid) Torque: 0.45 Nm max. Sealable, pitch 5 mm **Auxiliary Input/Output (six or four terminals):** Screw type: Combo head Wire size: min. 0.2 mm^2, max. 1.5 mm^2 (stranded or solid) Torque: 0.4 Nm max. Sealable, pitch 4.6 mm
Mounting	DIN rail
Overvoltage category	III
Pollution degree	2
Protective class	Class II
Rated impulse voltage	4kV



Environmental

Operating temperature	From -25 to +70 °C / from -13 to +158 °F
Storage temperature	From -30 to +70 °C / from -22 to 158 °F
Altitude	Max 3000 m / 9842.52 ft

Note: R.H. < 90 % non-condensing @ 40 °C / 104 °F.

Power Supply

Type	Self power supply
Frequency	50/60 Hz
Consumption	10 W / 15 VA

Compatibility and conformity

Electrical specifications

Electrical system	
Managed electrical system	Single-phase (2-wire) Two-phase (3-wire) Three-phase with neutral (4-wire) Three-phase without neutral (3-wire) Wild-leg system (three-phase, four-wire Delta)

Voltage inputs	
Voltage connection	Direct
Rated voltage L-N (from U_n min. to U_n max.)	120 to 277 V
Rated voltage L-L (from U_n min. to U_n max.)	208 to 480 V
Voltage tolerance	From 0.8 to 1.15 U_n
Overload	Continuous: 1.15 U_n max.
Input impedance	Refer to “Power supply”
Frequency	From 45 to 65 Hz

***Note**: EMS can be also installed in a wild-leg system (three phases, four-Delta wires), where one of the phase-neutral voltages is higher than the other two.*

Current inputs	AV5	MV5
Current connection	Via CT	Via 333 mV current sensor
CT transformation ratio	2000 max.	-
Primary current	10 kA max.	10 kA max.
Rated current (I_n) input	5 A	333 mV
Minimum current (I_{min})	0.05 A	0.01 I_n (0.03 V)
Maximum current (I_{max})	6 A	1.2 I_n (0.4 V)
Start-up current (I_{st})	5 mA	0.001 I_n (0.003 V)
Overload	For 500 ms: 20 I_{max} (120 A)	For 500 ms: 8 V
Input impedance	< 0.3 VA	100 kΩ
Crest factor	3	1.414 @ I_{max}
Measurement type	by means of internal shunts	with external current sensors

Display

Type	Graphical matrix display
Refresh time	500 ms
Description	128 x 96 backlit LCD
Variable readout	Instantaneous: 5+1 dgt or 5+3 dgt Energy: 8+3 dgt

LED

AV5

The LED is Red coloured. Pulse weight: proportional to energy consumption and depending on the CT ratio, 16 Hz maximum frequency.

Weight (kWh per pulse)	CT ratio
0.001	≤ 7
0.01	7 < CT ≤ 70
0.1	70 < CT ≤ 700
1	700 < CT ≤ 2000

MV5

The LED is Red coloured. Pulse weight: proportional to energy consumption and depending on Primary current (I_n), 16Hz maximum frequency.

Weight (kWh per pulse)	Primary current (I_n)
0.001	≤ 35
0.01	35 < I_n ≤ 350
0.1	350 < I_n ≤ 3500
1	> 3500

Ports

Ethernet

Number of ports	2
Standard	ISO9847
LAN configuration	Static or DHCP IP Address; Net Mask; Default Gateway, DNS (primary, secondary)
Protocols	HTTP, HTTPS, FTP, FTPS, SFTP, Modbus TCP/IP, SMTP, NTP, Azure IoT Hub, AWS IoT, BACnet IP, Rest-API, Multicast DNS (mDNS)
Connection type	2 x RJ45 connector (10 Base-T, 100 Base-TX) Maximum distance: 100 m Integrated switch function to connect another Ethernet device

RS485

Number of ports	2
Function	1 Modbus slave port (for S1 versions) and 1 Modbus master port
Number of slaves (for the master port)	Up to 12
Connections	2-wire. Max. distance: 600 m
Protocol	Modbus RTU
Data format	Selectable: 1 start bit, 7/8 data bit, no/odd/even/ parity, 1/2 stop bit
Baud rate	Selectable: from 2400 to 115200

HAN port

Number of ports	1
Function	Access real time energy consumption from the smart meter
Connection	RJ12, 6P6C
Protocol	DSMR 5
Baud rate	Fixed: 115200
Data format	Fixed: data bit 8, no parity , 1 stop bit

ESY bus

Number of ports	1
Function	Connection with ESY bus accessories
Cable type	Min. Cat. 5E, not crossed
Cable length	Max. 100 m
Bus type	Daisy chain (refer to standard Modbus RTU requirements)
Number of ESY extension modules	Max. 10 units

USB micro bus

Type	High-speed USB 2.0 micro-B
Mode	Device
Speed	60 MB/s
Function	RNDIS (virtual Ethernet) Network access via IP: 192.168.254.254

USB type A port

Type	High-speed 2.0 Type-A
Mode	Host
Communication speed	60 MB/s
Function	Modem communications
Supported devices	USB modem/router can be directly connected
Supported file system	USB mass storage not supported

Wi-Fi

Technology	Wi-Fi IEEE 802.11 b/g/n 20/40 MHz
Centre frequency range of operating channel	2412 - 2472 MHz
Maximum EIRP output power	18.34 dBm
Number of channels	13
Channel bandwidth	20MHz, 40MHz
Modulations	DSSS, OFDM
Number of Tx antennas	1
Installation category	Mobile
Connectivity	2.4 GHz Spectrum Capabilities Wi-Fi CERTIFIED™ b Wi-Fi CERTIFIED™ g Wi-Fi CERTIFIED™ n
Optimization	WMM®
Security	Protected Management frames for SoftAP mode: WPA2™-Personal 2021-01 Protected Management frames Station mode: WPA2™-Enterprise 2018-04 WPA2™-Personal 2021-01 WPA3™-Enterprise 2020-02 WPA3™-Personal 2020-02 WPA™-Enterprise WPA™-Personal
Modes	SoftAP Station

Cybersecurity

Introduction

Cybersecurity is the practice of protecting systems, networks, and programs from digital attacks. These cyberattacks are usually aimed at:

- accessing, changing, or destroying sensitive information;
- extorting money from users;
- interrupting normal business processes.

Implementing effective cybersecurity measures is particularly challenging today because there are more devices than people, and attackers are becoming more innovative.

For EMS MV5/AV5, the security capabilities have been verified by UL to Level SILVER.

The SILVER rating certifies the enhanced security capabilities of EMS MV5/AV5 regarding:

- Access Control
- Industry Privacy Best Practices
- Product Security Maintenance.

Fig. 1 *UL Verified Level*

Fig. 2 *IoT Security Rating Levels Guide*

Pillars

- Secure boot.
- Easy upgrade function. Web app notifies users about the availability of a new software and firmware version; the whole upgrade process is managed by the EMS MV5/AV5.
- Fleet management: One-click over-the-air (OTA) update of multiple devices simultaneously.
- Secure access: thanks to MAIA Cloud, you can access a EMS MV5/AV5 system through a secure VPN (virtual private network).
- Minimalist approach: EMS MV5/AV5 has been designed to include only the necessary sub-systems into a highly optimized linux core, so to avoid unnecessary risks due to attacks to unmonitored services.
